

New developments in chromosome biology

&

SFB „MEIOSIS“ talks / internal talks

Tuesday, 11:30-13:00

Vienna Biocenter, Seminar Room 1 (6.501)

03.09.2024 SR 4 th floor (4.120)	Ralf Rabus ICBM, Carl von Ossietzky Universität Oldenburg	Striking physiology and cell biology of (marine) environmental microorganisms <i>Host: Kristin Tessmar</i>
10.09.2024	Frederic Beckouet Toulouse Centre de Biologie Intégrative	Mechanisms controlling maintenance of cohesin dependent loops <i>Host: Franz Klein</i>
24.09.2024	SFB-Retreat	
01.10.2024	Corentin Claeys Bouuaert LIBST, Louvain-la-Neuve	<i>tba</i> <i>Host: Joao Matos</i>
08.10.2024	Julien Dumont Institut Jacques Monod, Paris	<i>tba</i> <i>Host: Alex Dammermann</i>
15.10.2024		
22.10.2024	Luke Berchowitz Columbia University	The dual lives of pathogenic structures: from functional amyloids to domesticated capsids <i>Host: Joao Matos</i>
29.10.2024		
05.11.2024	Pascal Bernard ENS de Lyon	Understanding how the DNA-loop- extruding protein complex Condensin folds a chromatinized genome into mitotic chromosomes <i>Host: Franz Klein</i>
12.11.2024		
19.11.2024	Florenca Pratto GBB, Bethesda	<i>tba</i> <i>Host: Irene Thiemann Boege</i>
26.11.2024		
03.12.2024		
10.12.2024	Gerben Vader Cancer Center Amsterdam	<i>tba</i> <i>Host: Christopher Campbell</i>
